Italian (Intermediate)
German (Intermediate)

STACK

Python (Pandas, scikit-learn, PyTorch, PyMC)
SQL
Claude API & LLM tooling
Vector search (pgvector)
FastAPI
React / Next.js / TypeScript
Streamlit
Docker
GitHub Actions CI
Power BI / Tableau / Looker Studio
Power Apps
Git

Being kind is harder than being smart.
Let's try hard things together.

01 SUMMARY

Data scientist and product owner who joins teams to turn new technology into working solutions. 4+ years shipping decision-driving models, dashboards and AI tools across banking, marketing, industrial and public-sector problems — from the first conversation with the business to code in production. Comfortable in ambiguity, fast at learning a new domain, and at ease bridging engineers, analysts and senior stakeholders in six languages.

02 SELECTED WORK

AI / HR TECH

CV Hunter — AI Talent Matching

FastAPI · Claude API · pgvector · PostgreSQL · React
gemma.gf.github.io/cv_HR/#/dashboard

INDUSTRIAL / CHEMICAL PROCESS ANALYTICS

Sensorlab — Industrial Sensor Anomaly & RUL Lab

Python · scikit-learn · PyTorch · XGBoost · SHAP
sensorlab.streamlit.app

GOVERNANCE / PUBLIC DATA ANALYTICS

Swiss Governance Dashboard — Cantonal Data Cockpit

Python · Pandas · Plotly · Streamlit · Folium
gemma.gf.github.io/swiss-governance-dashboard/dashboard_real.html

03 EXPERIENCE

January 2026
– Present

Data & Analytics Specialist

UBS Business Solutions AG – CAO & Risk Integration Office · Zurich, CH

- Built a Power Apps process-control system for the risk areas, replacing manual tracking with automated workflows and live status monitoring.
- Core contributor to a strategic risk-integration programme, on the data and analytics workstream.
- Design and simplify data models to improve governance and usability; automate reporting with AI and analytics tools.

November 2022
– December 2025

Data Scientist & Product Owner

UBS Business Solutions AG · Zurich, CH

- Led the vision, development and delivery of a risk data quality product.
- Product Owner for two critical tools: an anomaly detection dashboard and a statistical validation engine.
- Managed a cross-functional pod of 5 (IT and business) through full agile cycles, cutting project time by 50%.
- Championed the Tableau to Power BI migration across the risk function.
- Translated complex model outputs into actionable recommendations for senior stakeholders.

April 2022
– September 2022

Business Analyst

Google (via Adecco Switzerland) · Zurich, CH

- Built a real-time Google Data Studio dashboard tracking user interactions and conversion funnels for a new YouTube feature.
- Defined success metrics and aligned measurement with product and engineering teams.
- Presented insights to senior stakeholders to guide feature roll-out.

January 2021
– April 2022

Data Scientist

KH Lloreda (KH-7) · Granollers, ES

- Developed regression-based sales forecasting models linking marketing spend, geography, and campaign timing to revenue.
- Integrated data from SEO, SEM, TV, Instagram, Facebook, and Amazon Marketplace into strategic dashboards.
- Conducted ROI, ROAS, and CPA effectiveness analysis to guide media allocation decisions.

04 EDUCATION

MSc in Data Science — Universitat Oberta de Catalunya (UOC), 2020–2022
MSc in Financial Management — Universitat Oberta de Catalunya (UOC), 2022–2024
BSc in Statistics — Universitat Politècnica de Catalunya (UPC), 2015–2019
BSc in Psychology — Universitat de Barcelona (UB), 2014–2019

05 HOW I WORK

Rapid Prototyping, LLM Integration (Claude API, embeddings), Forecasting & Anomaly Detection, Experiment Design, Dashboard & KPI Design, Production Delivery (CI, Docker), Stakeholder Management, Agile (Scrum)
